3.5 years experience delivering features end-to-end in a complex enterprise product: Angular/TypeScript frontends, Java backends, REST integrations across enterprise platforms.

EXPERIENCE

UL Solutions — Software Intensive Systems, Erlangen

Since March 2023

Software Engineer

- Designed, built and maintained **REST API** integrations connecting Stages with 5+ enterprise platforms — **Jira Cloud, ServiceNow, SharePoint Online**.
- **Owned** the security-critical execution environment (**isolate**-based sandboxing) for a **Jira Cloud Connect** app on **Azure Functions (Java, TypeScript)**, including webhook-triggered automation.
- Built a standalone **Java** application for a major automotive client to archive and navigate large-scale project data.
- Led **GitLab CI/CD** pipeline automation for database dumps and VM provisioning across on-demand demo and customer environments.
- Delivered **end-to-end** ticket tracking for **Stages 26.2**, covering **Angular/TypeScript** frontend and **Hibernate/GraphQL** backend from concept through release.

Fachbereich Mathematik u. Informatik, Uni Marburg

2019 – 2022

Student Researcher, Teaching & Network Assistant

- Taught a weekly tutorial on **functional programming** for 15 students (Summer 2021).
- Developed an **NLP** model in **Python** at Caixa LAB to extract psychological features from a social media dataset as part of a larger research project (Summer 2022).
